

CONVISO® SMART  
**Drilling quick guide for  
SMART KWS Seed**

SEEDING  
THE FUTURE  
SINCE 1856

# Before you drill

1. Start with a clean drill, **remove any non-SMART KWS seed** from the drill
2. Confirm SMART KWS Seed by checking the seed box. It should be labelled with **SMART KWS and branded CONVISO® SMART**, as per picture
3. Seed colour will be **KWS orange** on the outside with a **purple inner colour**, as per picture
4. Check SMART KWS seed is going into a designated **CONVISO® SMART paddock**

SMART KWS seed has been bred to be tolerant to the herbicide **CONVISO® ONE**.

**CONVISO® ONE** herbicide will kill non-tolerant beet varieties.

If you need to check where SMART seed has been drilled, remember that SMART KWS seed is orange on the outside with a purple inner colour.
